#### Accomplishments

- As CFO, managed the financial functions of Carlyle Inc during a 50% growth period. Assisted in the company's sale to Carlisle Companies, and the division spinoff of NetIG.
- Managed Kellogg ERP global systems implementation in Asia Pacific for nine operations and eight countries using Oracle integrated software for Finance and Supply Chain.
- As a member of the Ralston Purina Business Development group, responsible for the research, negotiation, analysis, and valuation of investment options in the People's Republic of China.
- Identified the "target investment markets" which subsequently became the basis for the company's investment strategy.
- Responsibilities in the clinical laboratory division of SmithKline Beckman included financial reporting, budgeting, financial planning, and acquisition analysis. Established acquisition procedure and financial modeling template to evaluate six laboratories, resulting in the acquisition of three laboratories within two years. Successfully transitioned three acquired laboratories into the SmithKline organization and financial systems.
- Managed the general and cost accounting functions of Louver Drape, a manufacturer and innovator of the vertical blind with sales of \$50 million; successfully controlled staff size and maintained accurate and timely financial reporting while company grew at 50% per year. Created and installed cost accounting and inventory control systems.
